**Influenza and Mask Policy Update**

*On behalf of Josh Adler, MD, Chief Medical Officer*

The prevalence of influenza in the community and at UCSF have decreased; therefore, the UCSF Medical Center mask policy is lifted effective today, April 1, 2015. Please remember that entering the rooms of patients who have been placed on specific communicable disease precautions (airborne, contact, droplet, etc.) may still require the use of personal protective equipment.

Thank you.
