Still Time to Get Your Flu Shot!

Sent: Mon 11/30/2015 12:39 PM

Dear all,

There is still time to get your flu shot!

The annual flu shot clinics have ended, but it's not too late to get a flu shot. UCSF residents and fellows can visit Occupational Health Services during posted drop-in hours to receive a flu shot. To view drop-in clinic locations and hours of operation, visit the Occupational Health website.

The UCSF flu shot policy requires that all UCSF Medical Center employees, students, residents, fellows, and volunteers be vaccinated for the seasonal flu. As required by state law, anyone who declines a flu shot must sign a declination form and wear a hospital-supplied mask while in areas where patients are seen, evaluated and treated. The online flu declination form is available on the occupational health website here.

Residents and fellows who receive a flu shot outside of UCSF must bring documentation to Occupational Health Services to receive a badge sticker.

For information about the flu-shot program, please call Occupational Health at 885-7580, option 1, or send email to occupationalhealthservices@ucsf.edu.

Thanks!
