

New Education Innovations Funding Grants Awarded

[The Haile T. Debas Academy of Medical Educators](#), in collaboration with the [UCSF Program for Interprofessional Practice and Education](#) and the [UCSF Library](#), is pleased to announce 15 new Education Innovations Funding awards for the 2018-2019 academic year. Totaling \$329,806, these intramural grants are expected to make significant contributions to educational excellence at UCSF. Working collaboratively to integrate programs and resources has expanded our capacity to provide the campus community with more efficient and effective support that leverages creative partnerships, raises the visibility of scholarly work in education, and reaches successfully across traditional domains in education.

Our collaboration of three UCSF programs that fund education innovations addressed a range of priorities in education of students and trainees at UCSF. Responsibility for reviewing the submissions was shared within the collaboration. The call resulted in an unprecedented crop of strong proposals. Thus, we sought and identified additional funding partners including Academy and Matched Endowed Chair holders and the Office of the Executive Vice Chancellor & Provost. The Academy also thanks Sonja Schmid and the UCSF School of Medicine Class of 1988 for their generous donations.

The Academy's Innovations Funding program, open to all UCSF faculty, provides intramural grants for the development of new curricular programs and promotion of constructive curricular change. Since the program's inception, the Academy has awarded more than \$2.9 million to more than 160 projects.

The UCSF Library and the Program for Interprofessional Practice and Education have collaborated to support interprofessional education projects since 2009. During this period they have funded more than 40 projects for over \$550,000.

The call for the next cycle of Education Innovations Funding grants will be released in the summer of 2018. For more information, contact Kathleen Land, kathleen.land@ucsf.edu.
