What is Flipgrid?

Flipgrid is a video discussion platform that provides a virtual space to see and hear from every participant and foster a fun and supportive social learning environment.

How to get started:
1. Set up an Educator Account with your UCSF email address [https://auth.flipgrid.com/signup](https://auth.flipgrid.com/signup)
   - Once you create an account, Flipgrid will also be available through O365 UCSF Login
2. Create a group
   - A group is your community such as a class, cohort, mentees, peers
   - Public discussions are also possible through moderated topics
   - It is possible to have multiple, distinct groups
3. Create topic(s) for discussion
   - Post a prompt or multiple prompts by writing a description and adding media such as images
4. Interact
   - Participants can post video (or audio only) contributions.
   - Participants are required to create a Flipgrid participant account with their Google or Microsoft credentials.
   - Participants can respond to each other by writing comments or adding additional video posts
   - Participation can be moderated and allows the educator to decide which videos are posted to the group.

How could this tool be used?

Practice clinical interactions
- Explain an important concept to a patient
- Explain how to perform a procedure

Reflections
- Weekly check-in reflections with coaches
- This could build a 1:1 video library to show growth over time

Clinical Reasoning
- Explain your clinical reasoning to reach a diagnosis

Community Building
- Respond to weekly check-in or ice breakers

Inquiry & Research
- Summarize an article
- Pitch ideas for a research project
- Present a poster
