If you were to do anything differently in the residency application process, what would that be?

Encourage people to talk with near-peers and really know their specific specialty because everything from competitiveness to basics is really specialty-specific.

Not schedule as many interviews, the two day back-to-back schedule can become a grind.

Please provide any other information that might be helpful to UCSF students who will apply to your specialty choice in the future

This is an awesome field and EVERYONE I met on the interview trail were fabulous caring, individuals.
