Relax, enjoy it.

None

apply earlier to aways

**Please provide any other information that might be helpful to UCSF students who will apply to your specialty choice in the future**

Talk to mentors in the field, get involved with research early, think about away rotations to places you are interested in and prepare early, attend conferences/network early as well. Reach out to upper classmen going into neurosurgery and always feel free to reach out to alumni too!

NA

Trust the insight of home students and sub-is at the places you interview.

Reach out early to residents and faculty

\*\*I applied to 60 programs (not 49; that was the max they let me put). Apply to aways as soon as they open and submit asap since many accept on a rolling basis. Try to go to as many interviews and pre-interview dinners as possible, even if you think its a "lower tier" program or you won't like it.
